Hello Mr. Vannucci:

I'm the patent attorney from Qualcomm that prepared a patent application entitled "Method and apparatus for sending almanac correction data to a mobile unit in a wireless telephone system" for the invention that you and Parag Agashe coinvented. We are preparing to file the application as a non-provisional application claiming priority to the previously filed provisional application and require your final comments regarding any changes to the application. One of the paralegals in my office, Victoria Pacey, will be sending you a copy of the application for your

review. Please let me know whether you have any changes to make to the application before we file the non-provisional application.

Also, please be aware that we will be needing your signature on the formal papers that declare that you and Parag are the inventors and that assign the rights to both Lucent and Qualcomm. We will also need to get information regarding the name of the entity that will hold the rights for Lucent.

If you have any questions at all regarding this matter, please feel free to contact me.

Victoria,

I signed the documents and sent them back to you. Giovanni's email is giovanni@vannucci.com .
As far as I know, he does not work at Lucent any more.

Regarding the assignment, should the patent be assigned to QUALCOMM and Lucent jointly?
